

CES College Graduation and Employment Rate Disclosure

Federal regulation 34 CFR § 668.41(d)(5)(iii) requires that if a school calculates employment rates for any purpose, these rates must be disclosed to prospective students and enrolled students.

CES College, North Hollywood calculates and reports graduation and employment rates to the CEO annually.

Graduation rates are calculated by taking cumulative enrolment minus number of students still enrolled divided by the total of number of students (excluding students unavailable for graduation due to transfer to another program within institution, who withdrew after the first day, death, military duty, incarceration or medical reason).

Employment rates are calculated by taking the number of graduates employed in the field of study divided by the total number of graduates (excluding graduates unavailable for employment due to further education, death, military duty, incarceration or medical reason).
